# ICT NEEDS ENERGY

Global ICT emissions (GtCO<sub>2</sub>e)

	CAGR % 2002-2011	CAGR % 2011-2020
Data centers	8.6	7.1
Voice & Data Networks	4.7	4.6
End-user devices	6.1	2.3

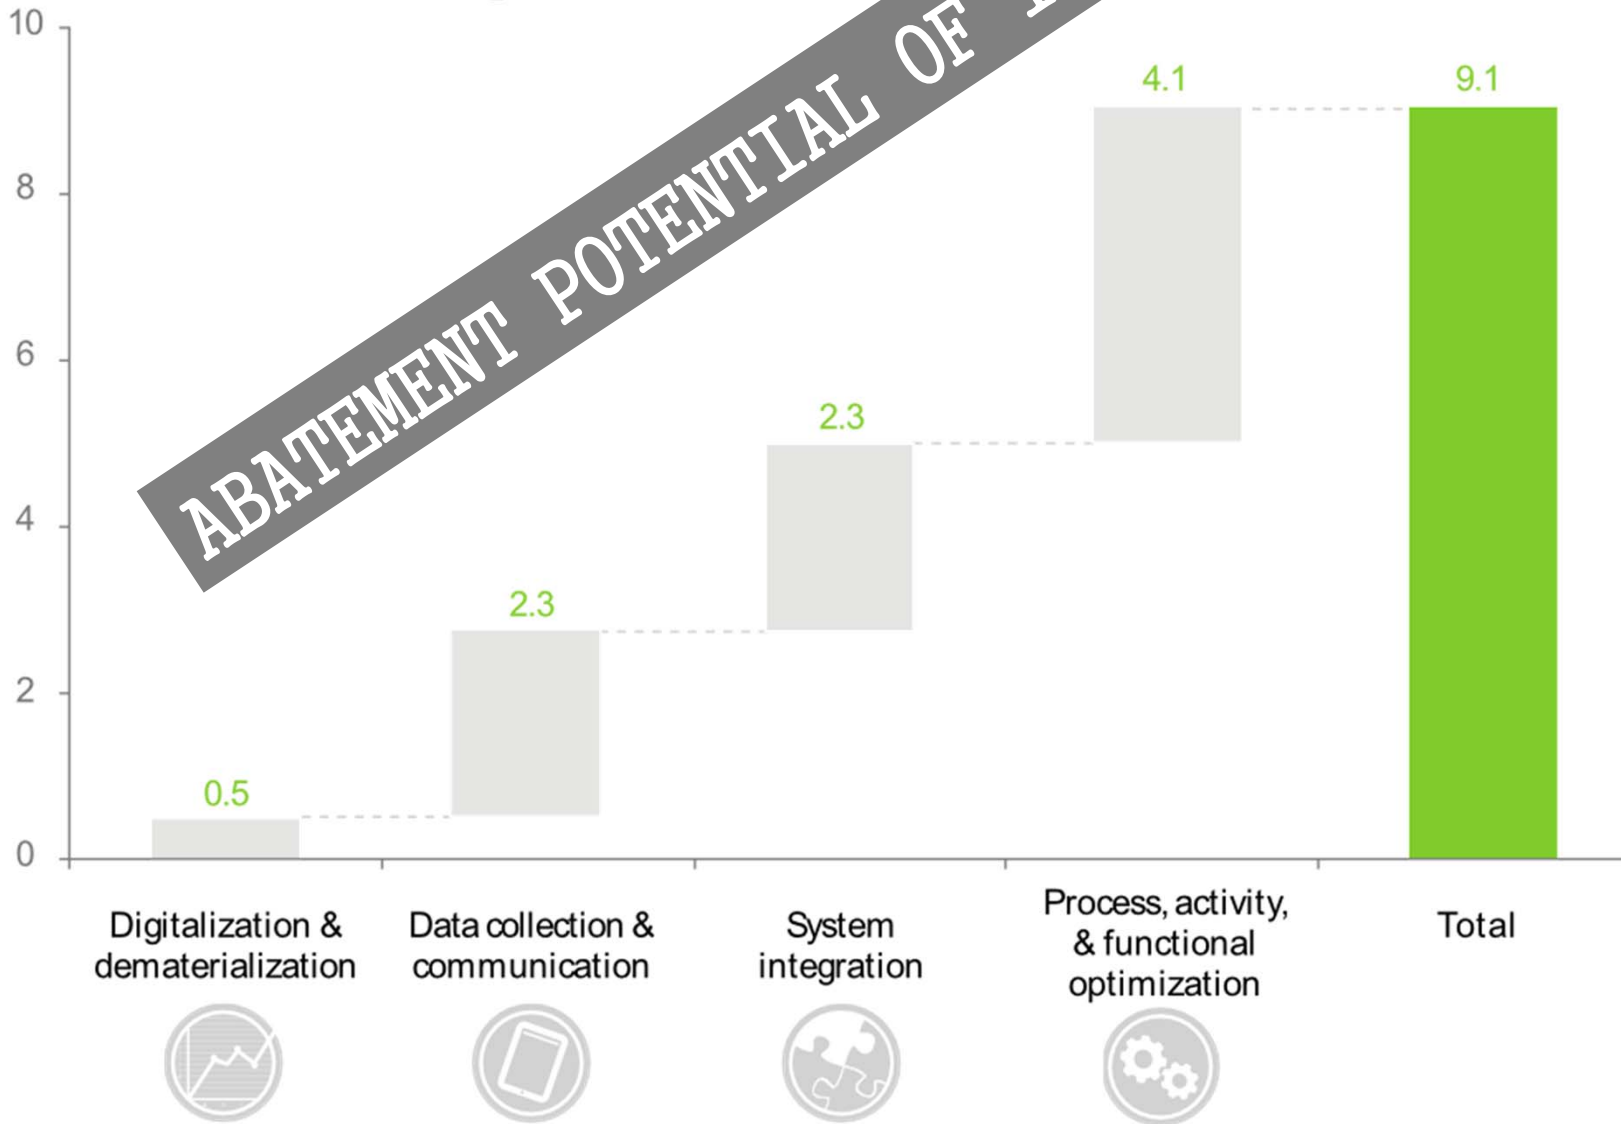

ICT as percentage of global emissions

1.3      1.9      2.3

Global GHG emissions (GtCO<sub>2</sub>e)

40      48      55

Abatement potential (GtCO<sub>2</sub>e)

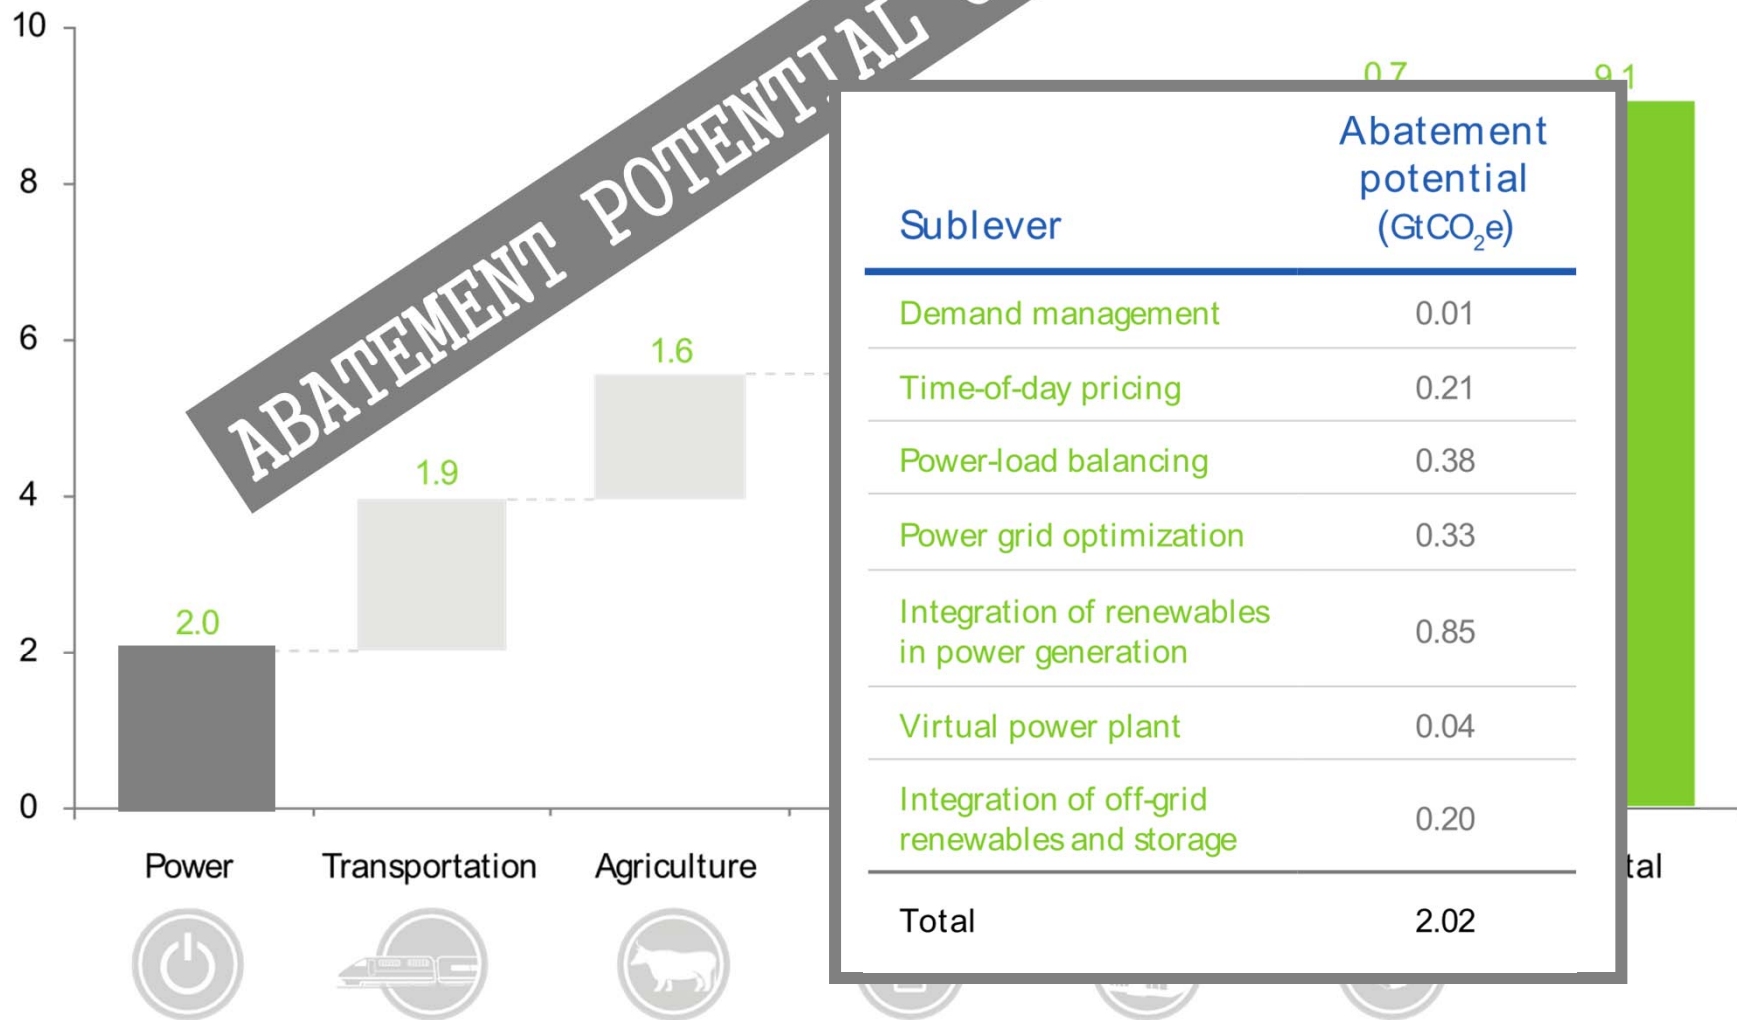

alessandro.bogliolo@uniurb.it

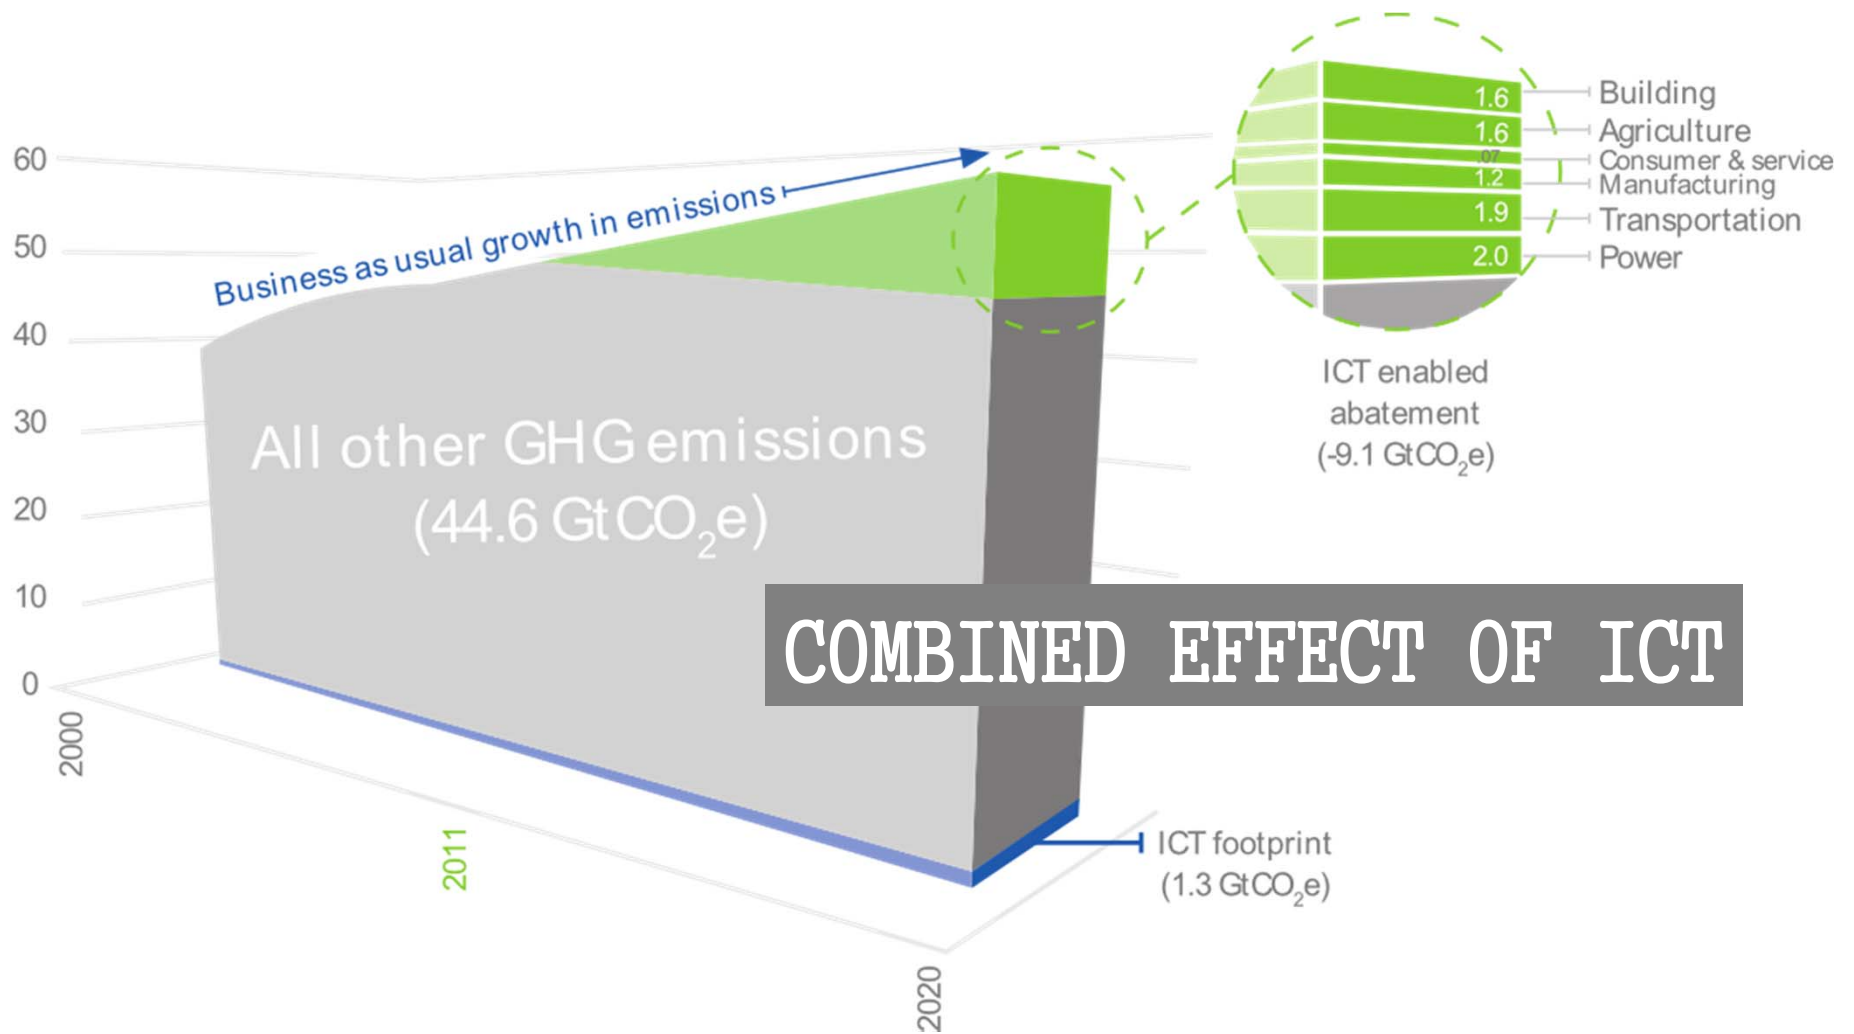

Abatement potential (GtCO<sub>2</sub>e)

alessandro.bogliolo@uniurb.it

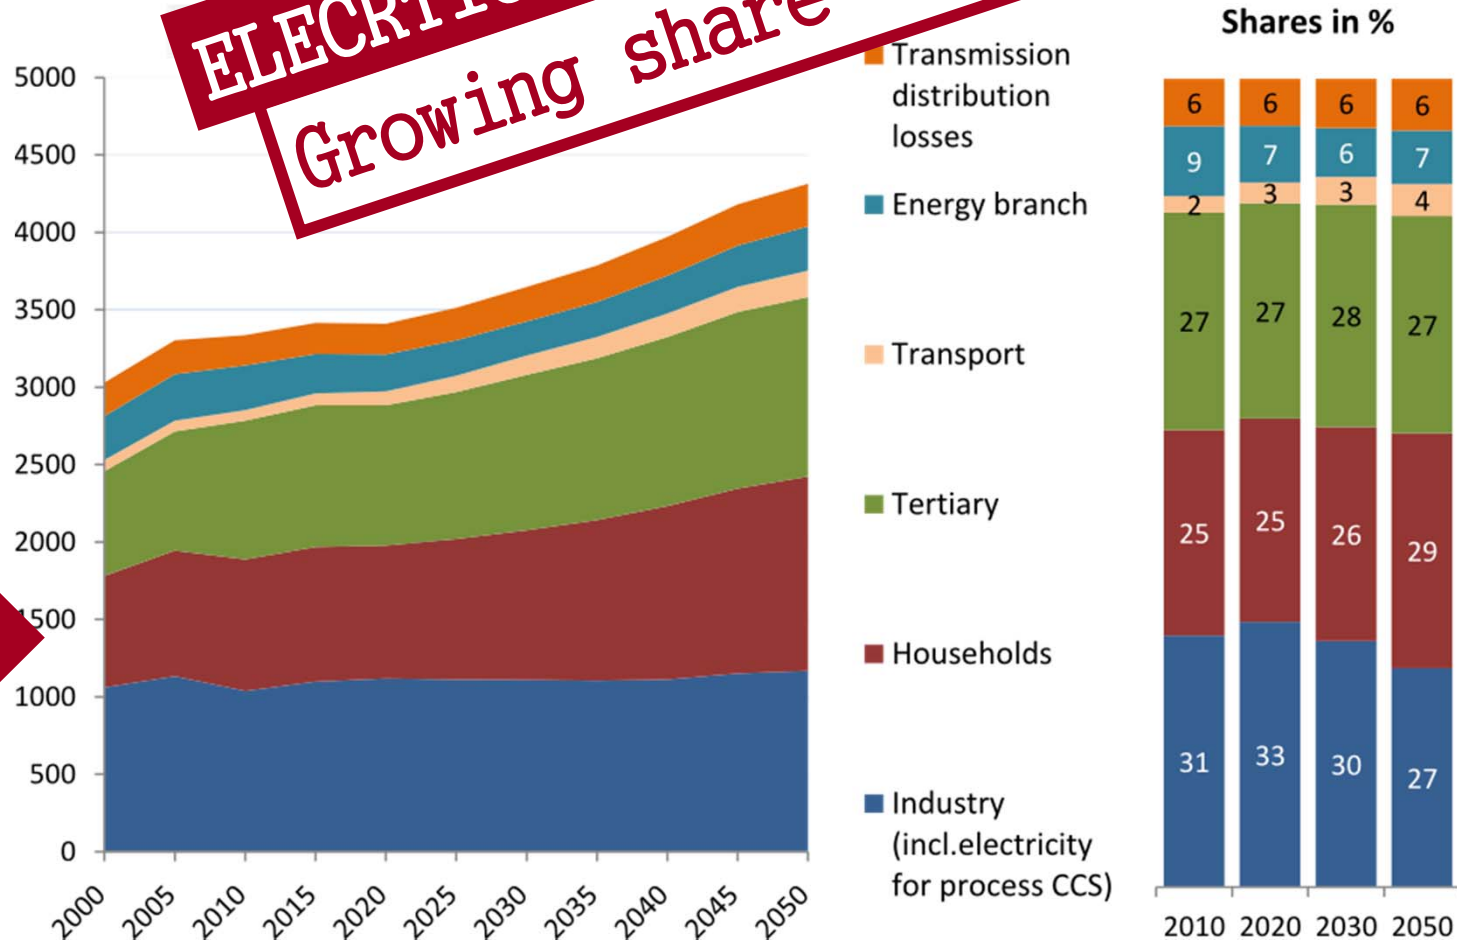

Abatement potential (GtCO<sub>2</sub>e)

# ELECTRICITY DEMAND

## Growing share of households

# ELECTRICITY GENERATION

## Growing share of renewables

# RENEWABLES

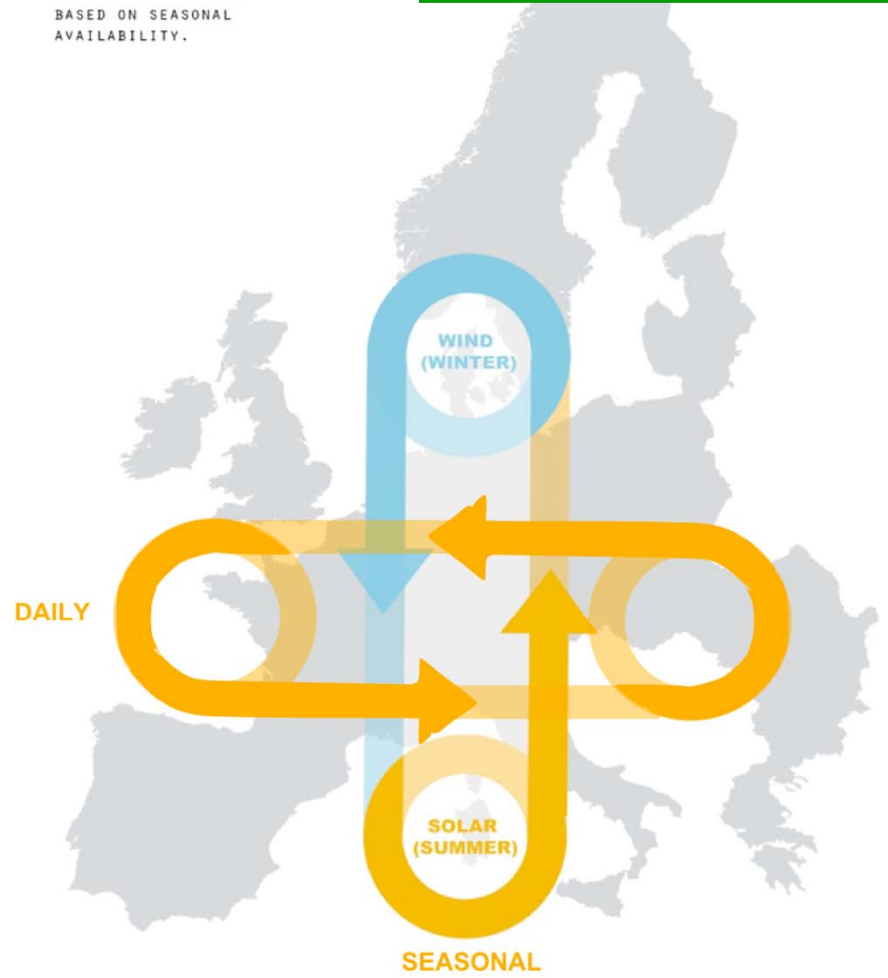

Vary over time

# RENEWABLES

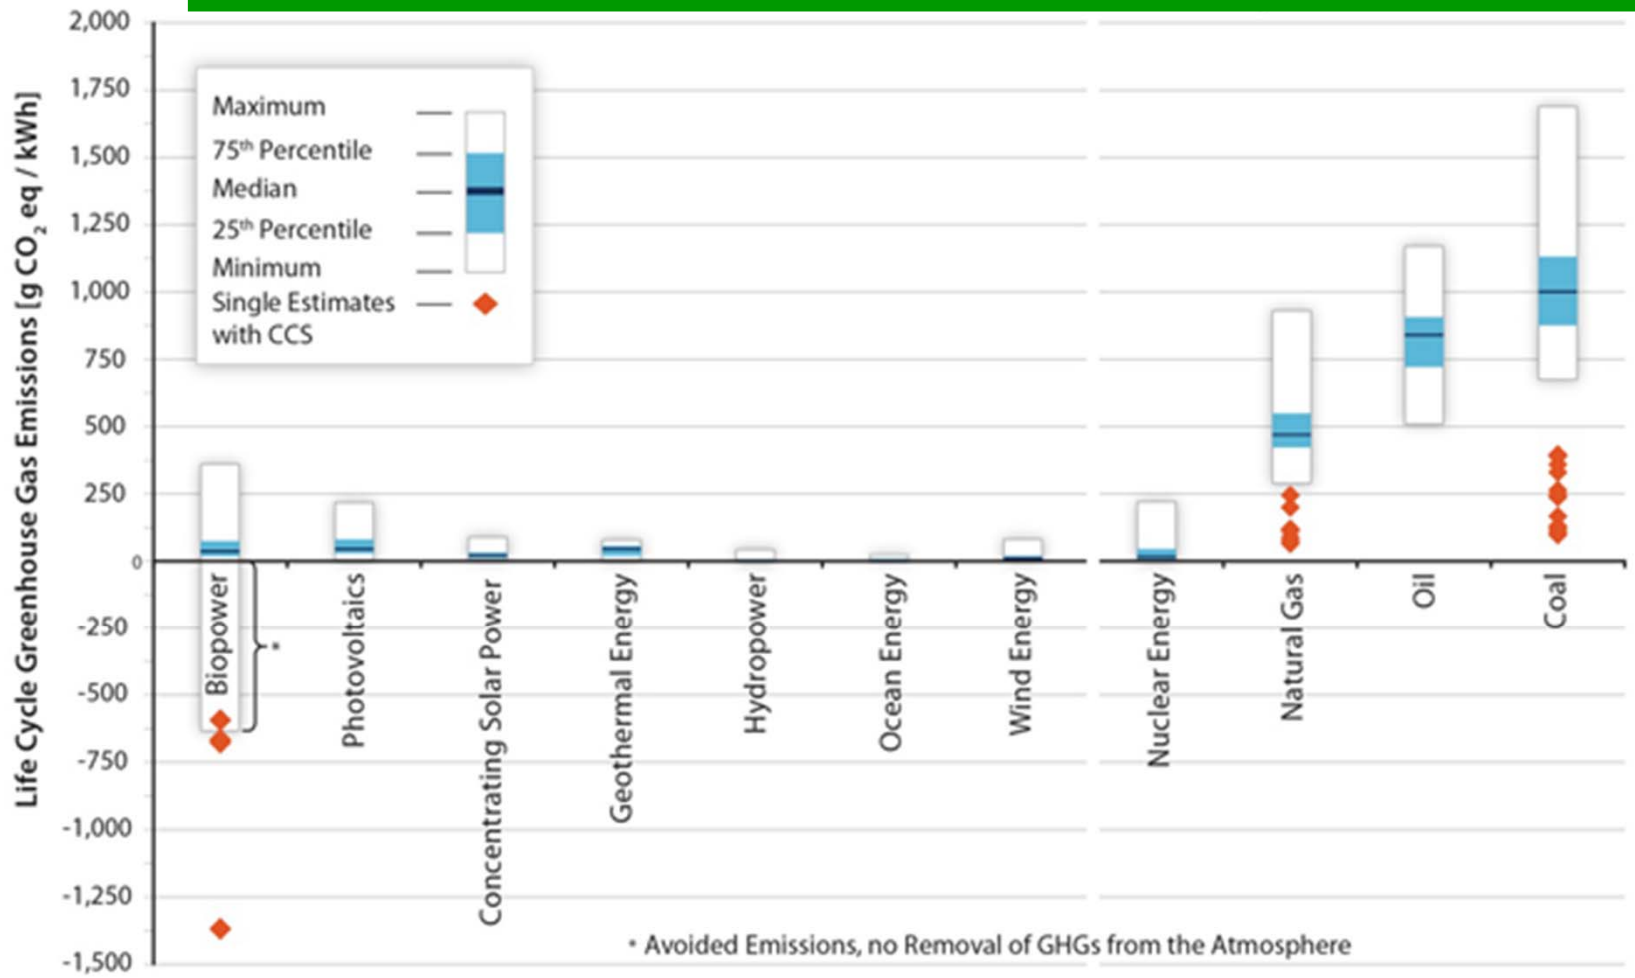

Vary in space

OVER THE COURSE OF THE YEAR, INTEGRATING EUROPE ALLOWS FOR SOME ENERGY SOURCES TO COMPENSATE FOR THE LACK OF OTHERS BASED ON SEASONAL AVAILABILITY.

# RENEWABLES

Decouple emission from consumption

## ENERGY

Should be used when and  
where it is available

## FLEXIBILITY

Needed at both sides of the grid to keep the network at 50Hz in spite of uncertainty

Network codes

Demand/Response

Primary reserve

1.5%

Unused capacity that can be activated in seconds

Changes in electric usage implemented directly or indirectly by end-use customers/prosumers from their current/normal consumption/injection patterns in response to certain signals

# DEMAND-SIDE FLEXIBILITY

<b>Instrument</b>	<b>Nature</b>	<b>Reaction</b>	<b>Timescale</b>	<b>Scale</b>
Contractual conditions	Static	Subject to decision	Months	Aggregator
Day-ahead market	Dynamic	Subject to decision	Days	Country
Intra-day market	Dynamic	Subject to decision	Hours	Country
Real-time price signal	Dynamic	Subject to decision	Minutes	Local-area
Control signals	Dynamic	Automatic	Seconds/minutes	From single site

## VALUE OF FLEXIBILITY

Every MW of primary reserve enables the connection of 66MW of renewables

Flattening consumption peaks and valleys reduce the need for overprovisioning

Demand-side flexibility reduces the need for underproduction

## CO2 ABATEMENT POTENTIAL OF ICT

Should take flexibility into account

# ENERGY@HOME

Energy operators

Telco

Vendors

End-users

Global optimization

End-user engagement

# ENERGY@HOME

Bridges the gap  
between smart  
energy grid and  
smart devices

Smart grid

Smart home

Smart device

Smart plugs

Not so smart  
devices

**FLEXIBILITY@HOME**

Can be built soon  
on top of E@H

Relax access constraints

Engage endusers in unleashing  
household flexibility potential

Allow stakeholders to play with  
the flexibility market

Pave the way to flexibility-aware  
policymaking and regulations
